

JONATHAN AARON CIPRIANO

160 Locksley Ave #3, San Francisco, CA 94122 - 415.503.9096 - cipriano.jonathan@gmail.com - www.redblind.com

OBJECTIVE

A career at a leading digital agency that will utilize and catalyze my creative and technical talents

WORK EXPERIENCE

Senior Interactive Developer - McCann SF - San Francisco, CA (2007-Present)

- Lead developer of high profile Flash and AJAX websites using AS3, GutterShark, Papervision3D, FlarToolKit, PHP, Code Igniter, Javascript, JQuery, Prototype
- Created a banner QA tool using Flex and PHP that parses Excel spreadsheet and batch tests SWF files
- Contributed in brainstorming sessions with creative directors to plan integrated campaigns
- Responsible for rapid prototyping and interaction design with and without comps
- Provided time and feasibility estimates to producers and account management
- Provided consultation and development resources to other McCann and MRM offices outside SF
- Mentored and lead other developers
- Brands include Microsoft, HP, Hitachi, Nortel, N.E.R.D., Mastercard, Boys & Girls Club of America

Interactive Developer - Grey SF - San Francisco, CA (2004-2007)

- Developed interactive web content for clients including Blue Cross, Mervyns, SanDisk, McAfee, Nokia
- Headed technical exploration and execution of creative concepts from brain storming sessions
- Worked in a team to successfully adapt, develop and deploy the award winning Tonik and Sound health applications to eight states across the United States using XHTML, CSS, AS2, JS, XML, PHP, and SQL
- Lead developer on Mervyns.com- responsible for building out site refreshes and new features as well as provided technical guidance to the Mervyns' creative team using XHTML, CSS, JS, AS2, C#.NET, XML, and SQL
- Developed the Dispatcher JavaScript API which allows third-party tracking vendors, such as Double-Click, to integrate their tracking seamlessly into full Flash or DHTML applications
- Responsible for all Webtrends integration- specializing in adapting SDC tracking to Flash, DHTML, and AJAX applications
- Oversaw and interacted with offshore development teams in China and India
- Brands include Blue Cross, SanDisk, Mervyns, Nokia, McAfee, BMW

Systems Analysis & Design Intern - Lockheed Martin/NASA - Moffitt Field, CA (2000-2001)

- Performed systems analysis of internal engineering and business operations including the development of functional specs, use cases, and process/data flow diagrams
- Designed user interface and process flow for the Verification and Validation Database currently being used for the Space Station Biological Research Program at the NASA Ames Research Center

EDUCATION

BS Management Information Systems (MIS) - San Jose State University - San Jose, CA (2004)

- MIS is a concentration of Business Administration. MIS focuses on systems analysis and design, data flow, process optimization and risk assessment of technology projects
- Electives included Database Management w/ Oracle, Web Programming w/ PHP, Programming w/ VB, Programming with Java, and Programming with C++

TECHNICAL SKILLS

- Valid XHTML, CSS
- OO AS3, Legacy AS2
- JavaScript, DOM manipulation
- PHP, C#.NET, SQL
- Source Control (SVN, GIT, TFS)
- JIRA, Mantis
